Course Name Introduction to Sustainable Development Theory
Professor(s) Solange Teles da Silva
Office hours: 48 class hours
Course Overview <p>The aim of this course is to analyze the concept of sustainable development based on its dimensions, contradictions and potentialities, highlighting notably the relationship between law and the socio-environmental issue. It aims to focus on the challenges and limits of legal instruments for sustainable development. It also seeks to promote reflection on the role of different normative spaces and different actors in the definition and implementation of sustainable policies.</p>
Topics outline Sustainable development, dimensions and contradictions. International and national law, climate change and sustainable development. Environmental goods, property and socio-environmental conflicts. Environmental justice and sustainable development. Pollution and environmental policy. Economic instruments. Territorial management and sustainability. Production processes, trade and sustainable development. Technological innovations, risks and environment
Letter Grade Assignment Grade A (Excellent) - Grade points between 9 and 10 Grade B (Good) - Grade points between 8 and 8.9 Grade C (Satisfactory) - Grade points between 7 and 7.9 Grade D (Unsatisfactory) - Grade points between 0 and 6.9
