MACKENZIE

Mackenzie at a Glance

Mackenzie Presbyterian University (MPU) is a highly respected higher education institution in Brazil, with more than 150 years of tradition.

Founded in the 1870s by Presbyterian missionaries and educators who introduced pioneering practices and pedagogical innovations, MPU now boasts campuses in São Paulo, Campinas, and Alphaville, offering excellent educational facilities to foster professional skills, research, and citizenship. In 1965 Esther Figueiredo Ferraz, a distinguished member of the institution, became the first woman to serve as a university rector in Latin America. MPU is dedicated to promoting innovation and entrepreneurship through institutional policies developed in its undergraduate and graduate programs, as well as advanced research projects conducted by the Technological Innovation Center and various research groups.

MPU also houses clinics and laboratories focusing on autism spectrum disorder, digital TV, cognitive and social neuroscience, and advanced research in graphene, nanomaterials, and nanotechnology (MackGraphe), with the support of the São Paulo Research Foundation (Fapesp), MackGraphe places MPU at the forefront of research in this field worldwide and will have a strong impact on the technology industry in the coming years. Recognized for its high-quality educational standards by the Brazilian Ministry of Education (MEC) and national and international rankings, MPU was ranked the best non-public university in São Paulo by the Academic Ranking issued by Folha de São Paulo newspaper and the best private university in São Paulo by the Latin America University Rankings in 2023.

Noteworthy projects include research conducted by the Mackenzie Center for Radioastronomy and Astrophysics (CRAAM) which maintains collaborations with institutions like the National Institute for Space Research (INPE), and leads the Brazilian Space Geodesy Program in partnership with NASA.

Programmes to be offered in 2026

Course Components

MPU offers course components in foreign languages such as English and Spanish, in addition to some bilingual course components in its undergraduate courses.

Global Sustainability Experience in Brazil

This eight-week course offered by MPU present immersive educational experiences, entirely conducted in English. Tailored for university students, these courses aim to provide a deeper understanding of water management, sustainability and pollution.

INTERNATIONAL STUDENT TESTIMONIALS

Victoria Hurth
Universität Liechtenstein

"I am very thankful that I was able to gain this experience. Especially the people I will miss a lot. In this short time at Mackenzie, I have found some amazing friends."

Ynias Beyens
Universiteit Hasselt

"My best memory of São Paulo is a very hard task because I had so many. I lived in an international republica where I made a lot of new friends, both there and at school. In general, I could say that my entire exchange was the best time of my life."

João José Veiga Viveiros
Universidade de Coimbra

"I really enjoyed studying at Mackenzie. It's a '5-star' university. It has everything needed to train good engineers, starting with the teachers, who are all excellent professionals, as well as the computer room and library, which offer everything necessary for a good education."
