Sofia, 8 of November, 2018

To whom it may concern,

This letter supports the proposal "From Microscope to Telescope: Interdisciplinarity to Foster Human Development," project currently being submitted by Universidade Presbiteriana Mackenzie to Coordenação de Aperfeiçoamento de Pessoal de Nível Superior (CAPES) within its internationalization call.

Within the proposal, I confirm my intention to cooperate on the scientific research theme "Astroengineering: Engineering applied to space geophysics" by receiving students and researchers from Universidade Presbiteriana Mackenzie, as well as sending researchers from my Institute to visit Mackenzie.

Yours sincerely,

Corr. Mem Prof. DSc. Petar Getsov
/Director of SRTI/
