

TEXAS TECH UNIVERSITY

Edward E. Whitacre Jr.
College of Engineering™

Electrical and Computer Engineering

November, 9, 2018

To Whom It May Concern:

This is a letter in support of the proposal “From Microscope to Telescope: Interdisciplinary to Foster Human Development” currently being submitted by Universidade Presbiteriana Mackenzie to Coordenação de Aperfeiçoamento Pessoal de Nível Superior (CAPES) within its internationalization call.

Within the proposal, the Nano Tech Center (NTC) at Texas Tech University confirms its intention to collaborate in the research theme “The Nano- and microscale: functional materials and devices” by receiving students and researchers from Universidade Presbiteriana Mackenzie (São Paulo, Brazil), as well as sending researchers from NTC to visit Mackenzie, within the limits of the available resources.

Sincerely,

A handwritten signature in blue ink that reads "Ayrton Bernussi".

Ayrton A. Bernussi

Professor of Electrical and Computer Engineering

Co-Director of the Nano Tech Center
