Mackenzie's Professor is the winner of the Design for a Better World Award 2022

Carlos Marcelo Campos Teixeira, professor from the Design program from Mackenzie's Architecture and Urbanism School, received the Design for a Better World Award 2022, that recognizes projects that positively impact society to strive for a better world, for his project named "Cazoolo" which had the involvement of two Mackenzie Students. The project was developed by the professor's office, Marcelo Teixeira Studion, in collaboration with CBA+B+G, becoming the first Packing Development Center for Circular Economy of Brazil, in a collaborative process with Braskem. The project aims to accelerate packing development and help companies to reach their Packing goals in the following years.
