

Buenos Aires, 16 May 2018

Dr. Carlos Guillermo Giménez de Castro  
Universidade Presbiteriana Mackenzie  
R. da Consolação, 930  
Consolação, São Paulo, Brazil

Dear Dr. Giménez de Castro,

The aim of this letter is to support the proposal "*From Microscope to Telescope: Interdisciplinarity to Foster Human Development*", currently being submitted by Universidade Presbiteriana Mackenzie to Coordenação de Aperfeiçoamento de Pessoal de Nível Superior (CAPES) within its internationalization call.

Within the proposal, I confirm my intention to collaborate with the research on SpaceWeather, Solar Physics and Solar-Terrestrial Relations, by receiving students and researchers from Universidade Presbiteriana Mackenzie, as well as sending researchers from the Solar Physics Group at Instituto de Astronomía y Física del Espacio to visit Mackenzie.

Sincerely,

Dr. Cristina H. Mandrini  
Head Solar Physics Group at IAFE, CONICET-UBA  
Associate Professor University of Buenos Aires
