

SUPPORTING LETTER

Braga, May 6, 2018

To whom it may concern,

This is a letter in support of the proposal “From Microscope to Telescope: Interdisciplinarity to Foster Human Development,” currently being submitted by Universidade Presbiteriana Mackenzie to Coordenação de Aperfeiçoamento de Pessoal de Nível Superior (CAPES) within its internationalization call. Within the proposal, I confirm my intention to collaborate with the research on graphene components and devices for radio-astronomy in the terahertz and infrared ranges, by receiving students and researchers from Universidade Presbiteriana Mackenzie, as well as sending researchers from my Group on 2D Materials and Devices to visit Mackenzie.

Yours sincerely,
Dr. Pedro Alpuim

Group Leader of 2D Materials and Devices Group
INL – International Iberian Nanotechnology Laboratory
