

To whom it may concern,

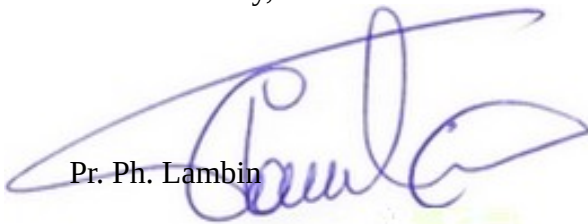

April 2, 2018

Dear Sir: / Dear Madam:

This is a letter in support of the proposal "From Microscope to Telescope: Interdisciplinarity to Foster Human Development", currently being submitted by Universidade Presbiteriana Mackenzie to Coordenação de Aperfeiçoamento de Pessoal de Nível Superior (CAPES) within its internationalization call.

Within this proposal, I confirm my intention to collaborate with the research theme "Micro and nanostructured multifunctional materials", by receiving students and researchers from Universidade Presbiteriana Mackenzie, as well as sending researchers from the University of Namur to visit MackGraphe.

Yours sincerely,

Pr. Ph. Lambin
