

University of Glasgow | School of Physics & Astronomy

Coordenação de Aperfeiçoamento de Pessoal de Nível Superior (CAPES)

Dear Sirs,

This is a letter in support of the proposal, *From Microscope to Telescope: Interdisciplinarity to foster human development*, being submitted by Universidade Presbiteriana Mackenzie to Coordenação de Aperfeiçoamento de Pessoal de Nível Superior (CAPES) within its internationalisation call.

Within this proposal, I confirm the intention of our School to collaborate with the research on Space Weather, Solar Physics and Solar-Terrestrial Relations. To this end we will receive students and researchers from Universidade Presbiteriana Mackenzie, as well as sending researchers from our School, particularly the Astronomy and Astrophysics Group, to visit Mackenzie. We note that the project is intended to run from 01/08/2018 until 31/ 07/2022.

We hope that this proposal will be successful and that we can look forward to further collaboration between our institutions.

Yours sincerely,

**Prof Martin A. Hendry MBE FRSE FInstP FRAS**
