MISSÃO DE INTERNACIONALIZAÇÃO UNIVERSIDADE AUTÓNOMA METROPOLITANA (México DF) CAPES PRINT UNIVERSIDADE PRESBITERIANA MACKENZIE

Period: from March, 30 to April, 09 2022

Professor in mobility: PhD. Eunice Helena Sguizzardi Abascal

Objectives, themes and methodology

This mission was done within the scope of the Project “Cidade, Projeto e Equidade: das Linguagens e Apropriações às Formas de Regulação”, and organized under the context of the linguistic, artistic and cultural representation. We understand that architectural and urban approach have a singular expression in the architectural and urban Project, and that are under the forms of regulation mediated by the laws, and that the complementary action between these expressions is a fundament to represent ideas, concepts and their materiality.

CAPES PrInt Mission was made in México City, in UAM, Universidad Autónoma Metropolitana (Campus Xochimilco). We were welcomed by Profs. Dr. Bernardo Navarro (Departament/Faculty: CYAD UAM-XOC, Analytics and Theoretical Department, and Metropolitan Transport Study Group Coordinator) and Professor Architect Ms. Roberto Eibenschutz Hartman (Full Professor and researcher of Universidad Autónoma Metropolitana-Xochimilco, and founding member of Metropolitan Studies Postgraduate Program).

The mission made it possible to begin important dialogues with the professors and students of UAM, about recent transformation of México City, by Plans and Urban Projects, with emphasizes in the Santa Fe CBD (Central Business District) Project. The debates with the partnerships focused the specificities of plans and projects with these characteristics in Brazil and México, and the different contexts of multi-scale urban interventions, such as different urbanistic tools used in both countries. The sustainable and equitable urban development themes, and several instruments in the scopes of Brazilian cities, especially in São Paulo, through Consortium Urban Operations and Urban Intervention Projects involve the society as a central element, with languages turned to the representation of technology, building, architecture and urban spaces, and the multiples instruments of urban regulation.

They were developed, during the ten days of the mission, most joint activities with the central theme:

- a) Bibliographic research in UAM’s Library and in its Documental Center in Regional and Urban Planning;
- b) Appointments and talking with Profs. Bernardo Navarro and Roberto Eibenschutz Hartman;

Results of the meeting

During this meeting it was outlined themes for future joint articles about the researched themes. The following lines have been designed for the elaboration of the joint production:

- Santa Fe Plan and Urban Project's process and transformation, in its thirty years of time, positive points and flaws;
- La Mexicana Park implementation in Santa Fe Business District, its urban operation, urbanistic instruments, public and private space issues, the park and its environmental impacts;
- Gates and connectivity built in Santa Fe to reduce space segregation problems of this area.
- Problems and mobility improvement actions in Santa Fe

Meeting with Prof. Dr. Bernardo Navarro Benítez

Prof. Navarro Benítez explained the institutional aspects of the mission, and the UAM's organization for the event occurred on April, 6th 2022, when Professor Eunice Abascal gave a presential conference to undergraduate and Pos-Graduate students, about: *Proyecto Urbano, principio y valor: São Paulo y Ciudad de México*.

The conference had Prof. Bernardo Navarro as a mediator and debater, and Professor Lisset Marques López (UAM Xochimilco) as a invited debater.

c) Meeting with CYAD Director, Centro de Ciencias y Artes para el Diseño, (UAM), Prof. Francisco Haroldo Alfaro Salazar, who was introduced to us by Dr. Navarro. In that opportunity, it was decided to make an academic agreement between UAM-Mackenzie, for students and professor mobility, and for specific joint actions, and to give continuity to the profit discussion that began with the mission.

d) Field and technical visits were carried out, as well as an iconographic research of the contemporary view of Santa Fe CDB.
